
Utility Companies Exploit Consumers

Posted by TheGothicWitch - 2008/04/16 15:50

Dear Editor:

Since customers were cutting back on the use of electricity by getting energy saving light bulbs, etc., the electric companies were losing money. Consequently, they invented multipliers, which are a mathematical concept used to take advantage of the customer. These multipliers are used at the option of electric companies, so when customers aren't using enough to produce the desired profit margin, they simply raise the multipliers, and get their money. The multipliers are so high now even people who use almost no electricity are saddled with a huge bill. Even worse, the public utilities' commissions have been no help whatsoever.

We might point out in Fascist nations utilities are provided at cost or given freely, as they're PUBLIC. The United Fascist Union proposes electric companies' monopolies be broken, and public companies be created that would charge the public for the electric they actually use; instead of letting some fat-belly private profiteers live the high life at the public's expense. The U. F. U. would revamp the system and make sure the Public Service Commissions of various Provinces work in public interest instead of working crooked deals with Executives of monopolies allowing them to exploit consumers.

Vote Fascist 2008!

Mr. J. Grimes
Presidential Candidate
of the United Fascist Union

United Fascist Union
Jack is a real beauty!
Wold Oligarchy Application
It's good to see that he has a global outlook.

Short Bio:

Jack Grimes -- who previously ran for President as a write-in candidate in 2000 -- bills himself as the "Leader and Director of the United Fascist Union." As for his use of the word "Fascist," Grimes explains he wants to restore a New World Order based upon the governmental style of Imperial Rome "to institute a military dictatorship form of government over the Earth." Grimes believes that "the psychic is the next great step in the evolution of humankind on this planet." And it gets more weird: Grimes wants to address "the dilemmas now facing America and the whole of Western civilization: Democracy, Christianity, International Capitalism, Earth Changes, U.F.O.'s, government cover-ups, and others." Citing to Cayce and Nostradamus, Grimes predicts that "the United States will be reduced from its present size to a small triangular-shaped land mass through the loss of many of its coastal states." While those quotes come from his old 2000 campaign site, his 2004 is equally entertaining. Be sure to visit the "Pictures" page to view Grimes and his girlfriend (presumably) posing in their homemade black uniforms ... and to view pictures of them eating at different local restaurants. Or visit the "Speeches" page to read Grimes' 1998 remarks delivered to the "Flying Saucer Society of Dover, DE." Best of all is the Discussion Boards section of his site, in which Grimes exalts his followers to worship Satan -- plus you can read about the problem he was having getting to a campaign event in another state (because Mom's car was broken, etc.). While Grimes failed to achieve ballot status in any states in 2000, he falsely boasts on his site that he was on the ballot in 45 states and placed 6th in the race.

I love the medal on his coat.

I must admit, we would be amused.
